Education

Oregon Health & Science University, August 2018 – May 2022
Department of Biomedical Engineering,
Portland, OR

Ph.D. Computational Biology, Advisor: Prof. Abhinav Nellore,

Dissertation title: *Applications of public omics data*

Compiled public DNA methylation array data; published recountmethylation Bioconductor package; characterized epigenetic variation across tissues; performed novel cross-study analyses; conducted independent validation of biomarker candidates; studied retained introns in long-read and short-read RNA-seq data; quantified splice junction expression in cancer and normal tissues; mined and plotted population HLA allele frequencies related to SARS-CoV-2 risk

Reed College, September 2007 – May 2011
Biology Department,
Portland, OR

B.A. Biology, Advisor: Prof. Suzy Renn

Rigorous science and humanities curriculum; research focus in evolution, statistics, and population genetics; fellowship in field and ecology survey research; thesis quantifying genetic diversity with microsatellite molecular markers.

Selected research experience

Postdoctoral research fellow (incoming) June 2022 – 2024

Dept of Biostatistics

Johns Hopkins Bloomberg School of Public Health

Baltimore, MD

Advisor: Prof. Stephanie Hicks

Gene expression in normal and diseased brain cells; single-cell sequencing; spatial transcriptomics; development of analytical tools for research; development of open-access bookdown documents for data science and analysis; utilization of public sequencing data from the Sequence Read Archive for independent validation; collaborations with the Lieber Institute.

Research Data Analyst Assistant
Fred Hutch, Seattle, WA

October 2015 – June 2018

Principal Investigators: Prof. William Grady, Dr. Ming Yu
Epigenetic markers of gastroesophageal cancer risk and progression; preprocessing and analysis of DNA methylation arrays; integrative analysis of epigenetics and RNA-seq data; wrote R scripts to conduct research; made a shiny dashboard to analyze epigenetic data and genome annotations.

Bioinformatics Research Intern

April – September 2015

Fred Hutch, Seattle, WA

Principal Investigator: Prof. William Grady; Postdoc project lead: Dr. Ming Yu

Analysis of colorectal cancer epigenetics; trained data science and R programming.

Laboratory Assistant

January – October 2013

Principle Investigator/Advisor: Prof. Gail Jarvik

University of Washington Medical Genetics

Analyzed clinical population and epidemiologic data; Quantified gene-environment interactions; Used programming workflows for next-generation data; Co-authored original research manuscript.

Scientific memberships, fellowships, and funding

Grad Student Travel Stipend

May 2019

MOMACS Modeling the World's Systems 2019

Washington, DC

Conference for statistical modeling hosted by University of Pittsburgh Dept. of Computer Science.

2016 SAS-BWF Fellow, Fred Hutch, Seattle, WA

May 2016 – 2017

Advisors: Prof. Bill Grady, Dr. Ming Yu

Fellowship hosted and funded by SAS Institute and Burroughs Wellcome Fund. Contributed to ongoing research of epigenetics of colorectal cancer and biomarker discovery for clinical screening. Worked closely with JMP developers, recommended software features based on research needs.

AACR Associate Member, Fred Hutch, Seattle, WA

Jan 2016 – 2017

Recognized and supported by Association for Cancer Research (AACR) as promising early-career cancer investigator. AACR is one of the largest cancer research organizations in the US, and it hosts numerous annual meetings and workshops to network and learn from colleagues.

Undergraduate Research Grant, Reed College, Portland, OR

Winter 2010

Advisor: Prof. Suzy Renn

Granted funding to extend research for undergraduate senior thesis studying genetic diversity of *A. burtoni* fishes (see Publications), awarded by Reed College Biology Department based on submission of original research overview.

Fischer Memorial Fellow, Reed College, Portland, OR

Summer 2010

Advisor: Prof. Robert Kaplan

Designed and conducted habitat field survey experiment of native at-risk frog *Rana aurora*, constructed breeding habitat and compiled a literature review of amphibian ecology. Authored and coauthored extensive reports presented as contributions to canon of Fisher Fellows.

Skills and expertise

R/Bioconductor (recountmethylation)

Python for analysis (pandas, numpy, scipy)

R for data science (data.table, dplyr)

Plots for publication (ggplot2, UpsetR)

Data dashboards (shiny and plotly)

Version control (git, GitHub)

Public omics data mining (GEO, SRA,

Entrez programming utilities)

Omics consortia (TCGA, CCLE, GTEx)

Relational databases (MySQL, SQLite)

Statistical tests (lm(), ANOVA, cor.test(), Chi Squared, Fisher Exact, etc.)

Model training (SVM, LASSO, random forests, AIC, discovery/validation)

Machine learning (neural networks, tensors)

Biomarker discovery (ROC, AUC, precision)

DNA methylation arrays (HM450K, EPIC)

RNA-seq analysis (long-read, short-read)

Peer-reviewed journal publications (+ first author)

Graduate level scientific coursework

Oregon Health and Science University, Ph.D. Computational Biology, Biomedical Engineering
Summer 2018 – Spring 2021 (expected)

BMI 550/650: Bioinformatics and
Computational Biology I: Algorithms
CS 545: Machine Learning

CONJ 650: Practice and Ethics of Science
BME 601: Prequalifying PhD Research

University of Washington, Public Health Genetics, Fall 2012 - 2013 (no degree obtained)

PHG 536: Bioinformatics and
Sequence Analysis
BIOSTAT 517/518: Applied
Biostatistics I and II
EPI 512/513: Epidemiological
Methods I and II
PHG 512: Law and Ethics in Public
Health Genetics

PHG 513: Pharmacogenetics and
Toxicogenomics
BIOST 580: Biostatistics Seminar
EPI 583: Epidemiology Seminar
GENOME 525: Topics in Human Genetics
PHG 511: Genetic Epidemiology
PHG 521: Culture and Societal Genomics
PHG 523: Genetics and the Law

Undergraduate scientific coursework

Shoreline Community College, Biotech training, Fall 2014 - Winter 2015 (no degree obtained)

BIOL 270: Molecular Biology

BIOL 285: Basics of Bioinformatics

BIOL 286: Molecular Diagnostics

BIOL 265/266: Solution and Media
Prep I and II

BIOL 275: Recombinant DNA

Reed College, B.A. Biology, Fall 2007 - Spring 2011

MATH 111: Calculus

MATH 112: Intro to Analysis

PHYS 100: General Physics I

HIST 315: Medieval/Renaissance
Science and Religion

BIOL 332: Vascular Plant Diversity

BIOL 101/102: Introductory Biology

CHEM 101/102: Introductory
Chemistry

BIOL 361: Genetics

BIOL 431: Seminar: Ecology and
Evolution of Plant-Human
Interactions

BIOL 358: Microbiology

BIOL 366: Population Ecology and
Evolution

CHEM 201/202: Organic Chemistry I
and II

PHIL 201: Logic

BIOL 351: Developmental Biology
(lecture only)

BIOL 431: Seminar: Chromosome
Structure

PHIL 316: Philosophy of Science

BIOL 431: Seminar: Gene
Duplication/Overexpression
